RiskPack 2016

NEW: FMEA Template

The RiskPack does now provide a specific template to aid you during FMEA activities. The calculation of the risk priority number (RPN) is based on the severity, the probability of occurrence, and the detectability of the failure and can be customized to fit your process. The resulting RPN values can be assigned to acceptance levels and predefined reports present all results of the FMEA.

NEW: Support of customized Risk Policies

With a new and flexible plugin separated from the base product, the calculations and rules of the risk policy can be easily customized.

NEW: RiskPack Administration

All RiskPack- and template-specific settings can now be managed in the RiskPack back-end administration via a graphical user interface. This does include user management and license information as well as RiskPack-specific mapping and settings of the risk policy.

IMPROVED: Customizable Report Tables

Using a new and powerful section builder, the layout of the report tables for sequences of events, risk control, and the risk details is now easier to configure.

IMPROVED: LiveReports

The revised RiskPack templates make now use of LiveReports, which are widget-compatible and more performant than the previous wiki pages.

IMPROVED: No Need for RiskPack-specific Link Roles

As part of the new back-end administration for template settings, RiskPack-specific link roles can be mapped to any other link role. Therefore, it is now possible to use the RiskPack without changing your link role configuration.

IMPROVED: No Need for RiskPack-specific User Roles

With the new back-end administration for RiskPack settings, any RiskPack-specific user roles are now obsolete.

IMPROVED: Bug-Fixes

Several bugs have been fixed to improve the functionality and usability of the RiskPack.

Components contained in this release

- RiskPack 2016 Default Visuals Extension (2.2.0)
- RiskPack 2016 Metrics Default Extension (2.2.0)
- RiskPack 2016 Default ISO 14971 Template (2.2.0)
- RiskPack 2016 Extension (2.2.0)
- RiskPack 2016 Administration Interface Extension (2.2.0)
- RiskPack 2016 Template Manual - ISO 14971 (RiskPack 2016)
- RiskPack 2016 Configuration Manual (RiskPack 2016)
- RiskPack 2016 Installation Manual (RiskPack 2016)
- RiskPack 2016 Changelog (RiskPack 2016)
- RiskPack 2016 Known Anomalies (RiskPack 2016)
- RiskPack 2016 Risk Management Library (RiskPack 2016)
- RiskPack 2016 Release Notes (RiskPack 2016)
- RiskPack 2016 Compatibility Visuals Extension (2.2.0)
- RiskPack 2016 Policies Default Extension (2.2.0)
- RiskPack Widgets (1.0)
- RiskPack 2016 Default FMEA Template (RiskPack 2016)
- RiskPack 2016 Template Manual - FMEA (RiskPack 2016)
- RiskPack 2016 Help - FMEA (RiskPack 2016)
- RiskPack 2016 Help - ISO 14971 (RiskPack 2016)
